

# What does FC mean for pigtail fiber

## Overview

---

The FC type fiber optic pigtail, short for Ferrule Connector, was developed in Japan. A fiber optic pigtail, also known as a fiber optic cable tail, is a type of fiber optic cable assembly that provides connection between fiber optic components or fiber optic cables. According to different application scenarios and requirements, there are a variety. While the small size of fibre optic connectors does not mean they play a minor role, the type of connector you use affects the overall efficiency of light transmission across the fibre network.
