What is the light source of a fiber optic red light pen

Overview

Luxbond LBTEK Fiber Optic Red Light Pen (also known as a pen-style visual fault locator or fiber optic fault detector) uses a 650 nm semiconductor laser as the light source. Tool sends visible light over a fiber strand with a 10mW power, good enough to reach distances of up to 10Km. This compact and lightweight tool is an essential instrument for field technicians and.
