# **What is the thickness of fireproof cable trays in Mauritius**

## Overview

---

The gap area between firestop packs and cables should not exceed 1 cm<sup>2</sup>, and the packing thickness should be not less than 24 cm. Select the tray width and thickness according to the number and weight of cables. Ensure mechanical strength is sufficient to prevent deformation or failure under full load. The Cablofil global solutions offer for steel wire cable trays (and accessories) is one of the most complete offers on the market. It offers genuinely flexible cable management, making it possible to create multiple configurations in a vast array of finishes for optimum integration in any. Crafted for seamless cable routing and protection, our welded cable trays offer robustness and precision, ensuring efficient and organized. Installed in may be placed as needed such as Overlap of 75mm between adjacent cable tray wrap pieces.
