What to do after fiber optic cable is installed and router is set up

Overview

All you do is tether the router or first mesh unit to a modem, fiber optical network terminal (ONT), or gateway, load up a web interface or mobile app, and follow the instructions. However, if you're not accustomed to some of the jargon, like MAC cloning and PPPoE, you may. In this article we'll break down how fiber internet is installed - from the network fiber drop outside your house to the in-home setup with your router and gateway - and what you should expect at each stage. After the new fiber optic cables have been run underground, our approved contractor will run a service drop, also known as the fiber optic cable line installed between your street and your residence.
