

What to do if an optical cable falls off in the middle

Overview

Repairing fibre optic cable can be broken down into four steps: identifying where the damage is, isolating the damaged area, repairing the damage and testing the cable. The obvious first step is to locate and assess the extent of the damage to the fibre optic cable. If you have connected the cable correctly and still having the loose connection issue, then you can follow the other methods below. Dekam Fiber's state-of-the-art solutions, including our UltraRepair kits, make these processes accessible and reliable.
