What to do if the indoor fiber optic cable is not long enough

Overview

Misjudging the length of fibre optic cable needed can lead to insufficient cable length or excessive slack. Accurately measure the distance and account for all bends and loops in the cable path. If possible, use an automated puller with tension control or at least a breakaway pulling eye. Let's dive into the most frequent headaches, how to spot them, and, most importantly, how to get your network back on track.
